### INTERNATIONAL SUSPICIONS

Americans can laugh at the Japs because of illness for making a mountain out of al caught photographing American fortifications, there are sections of the United States where quite as much noise would have been made over the incident as has been made, in Japan.

The two American aces are guilty of error in judgment if they are guilty of anything. Their first mistake was in hovering over armed fortifications in a foreign land to which they had not been legally admitted, and their second was in photographing those fortifications. They may or may not have taken the pictures knowing them to be rare, but it is quite certain that they would never have found their way into military channels for military

Setting the situation on Pacific coast soil and correspondingly reversing the nationality of the personnel provides an opportunity for fairer judgment of the Japanese proceedings. Much would have been heard of the "Yellow Peril" from the jingoes who see in every Oriental act and word an aggressive move against the United States. Would there by any suspicions of Japanese plotting or any show of racial prejudice against these friends across the Pacific, who, according to diligent propaganda, are supposed to be jealous, if not actually enemies? As much as there was in Japan, probably.

Nations and people must be narrowly suspicious to attach such significance to harmless gestures, but, because they are petty and quick to suspect evil, it behooves all to avoid arousing these unhappy passions.

# REPUBLICANS!

POLITICAL ADVERTISEMENT

Tuesday, September 15th, will make history in the political af fairs of Bucks County. You will go to the polls and nominate a ticket to be voted for November 3rd, and this ticket will present candidates for the most important office in the county—the board of commissioners. The county commissioners are the stewards of your finances. They have the power to lay taxes, and enforce collection. Do you want a man in this office free from organization control? Do you want service responsive to the will of the people, or do you choose to have men who will respond to the lash of the organization whip and each time it is applied answer yes? If you do, vote the gang ticket. Don't kid yourselves, the organization selects the men and you ratify. The year 1931 offers an opportunity for you to place in office a candidate -able, worthy and efficient. Howell Burgstresser, of Erwinna, Tinicum Township, is pledged to give you an administration in keeping with your needs. The recent valuation of the real estate of our county in the midst of a serious economical depression is a sample of organization control. In spite of the difficulty of weathering tax bills on the basis of 1930 valuations the political machine in control flouts you in the face by increasing tax bills all over the county. With the price of wheat 50c per bushel, and milk 3c per quart, agriculture, the most important business in our county, faces a real hardship. The most important issue in county, state and nation is taxation. When will the increase stop? It will come to an end in Bucks County if you, the voters, decide to place men in nomination, free from political control. Howell Burgstresser is free from machine control. He is fighting your battle—the battle for real county government. Go to the polls and demonstrate that the spirit of 1776 is not dead in Bucks County and that all Republicans have a right to aspire for public office without cowing in sackcloth and ashes to a ruthless political machine. Do you believe this? If so, go and vote your convictions.
